

## **Bow Geo**

Bow Geo is based in Tromsø and offer G&G products and geological consultancy services to exploration companies within the oil and gas industry.

Bow Geo is specialized in subsurface evaluation of the Barents Sea and the Norwegian Sea where we have long experience in regional evaluation, prospect evaluation, reservoir analysis, and geophysical evaluation. We have been heavily involved in all concession rounds since the 16th Concession Round on the Norwegian Continental Shelf.

Bow Geo has established a complete database of public seismic and wells.

Bow Geo has also invested in several technical (e.g. Petrel) and graphical software to complete full and integrated prospect evaluation studies

### **Bow Geo offers assistance to:**

- Complete applications and G&G services for concession rounds
- Preparation for concession rounds
- Regional and Semi-regional reports
- Farm-In evaluation
- Licence follow-up/DoD evaluation and recommendation
- Other G&G studies

### **Bow Geo prospect portfolio**

Bow Geo has a numerous of prospects and leads in our portfolio. This database includes also stochastic volume estimates, risk evaluation, geophysical support etc.

Bow Geo is constantly working to expand and improve our prospect and lead portfolio in concession rounds areas (ordinary concession and APA rounds). A full and integrated G&G approach is used in the de-risking. Bow Geo has also access and utilizes EM data in areas where we believe it can make a difference
